The National Coin Album was designed and patented over twenty years ago. Over the years constant improvements have been made in construction, material and layout. Keeping your coins in this booklike form will give your collection order and compactness. Whenever your collection is displayed you are assured of complete protection from finger-marks and tarnish which result from actual handling of coins. Both obverse and reverse of the coins may be seen through sections of transparent slides which cover each row of openings. These sections slide out from the edge of the page by a slight friction of the fingers (see illustration). After the coin is inserted the slide is returned to its original position. Each page is made of heavy chipboard faced with tough cover stock in a pleasing tan color. The edges are bound with brown cloth tape. The sturdy construction of these pages and binders will withstand years of use.

NATIONAL COIN ALBUM

Large and Small Pages are available—PRINTED or PLAIN. Printed pages have the dates or title inscribed below each opening. The plain pages are for the use of collectors who prefer to arrange their coins in some different sequence and to do their own lettering. The plain pages may also be used for foreign coins by arranging the coins according to size.

PRICE LIST OF THE POPULAR, GREEN COIN ALBUMS

The twenty-four different U. S. Coin Albums listed below have been especially made for use in housing the coins most widely collected.

In style and design they have been manufactured along the same lines as the more expensive loose leaf Coin Albums except that each row of openings has only one transparent slide, which can be moved by friction of the fingers toward the outer edge of the page. These albums are sturdily constructed of heavy dark green cover stock, attractively designed with portrait and title, and are

5½ x 8 inches in size. The date, mint mark and number of pieces struck are printed under each opening. The \$.75 albums have 2 pages; the \$1.50 albums have 4 pages.
